strangeness at low W: simulation vs gamma p data
fraction of events with strangeness
W [GeV]
data: K+L + K+S0 + K0S+ (SAPHIR) / sigma_tot
Geant4 11.2 muonNuclear (Fe)
Pythia 6 (p, n)
data: ABBHHM all identified (lower limit)
data: SLAC visible strange decay (lower limit)
Lambda per event; data = KY channels (all near threshold)
Lambda (+Sigma0) per event
W [GeV]
data: same, CLAS (measured angles only)
Geant4 11.2 muonNuclear (Fe)
Pythia 6 (p, n)
data: (K+L + K+S0) / sigma_tot, SAPHIR
